SYSTEM SOLUTIONS
PROFESSIONAL EXECUTION, HIGHEST QUALITY AND FLEXIBLE SERVICE

WE DESIGN, ASSEMBLE, CHECK, AND DOCUMENT CONNECTION-READY SYSTEM SOLUTIONS.
WE ARE NEVER SATISFIED WITH JUST FINDING ANY SOLUTION. INSTEAD, WE AIM TO FIND THE BEST SOLUTION FOR EACH CUSTOMER.

- Connection-ready system solutions reduce your design and project-management costs.
- Developed specifically for your application.
- 100% tested.
- Incl. detailed documentation.
- Our experience from executing more than 6,000 system solutions ensures that you get the functionality you need without compromising cost security.
- Technically maintenance-free cycle provides maximum system availability.
- Optimised dimensioning of components reduces gripper weight, optimises dimensioning of the robot itself, and thereby minimises cycle times.
- Implementation of additional functions like cameras, sensors, measurement sensors, and screw functions reduces your costs and optimises your application.

ZIMMER GROUP SYSTEM SOLUTIONS

With more than 30 years of experience as a partner to customers in virtually every industry, we are intimately familiar with the requirements of modern manufacturing systems. Whether in mechanical engineering, the automotive and supplier industries, plastics engineering, consumer products, or foundries: The potential uses of robots are virtually unlimited. Our gripper systems will not limit your options. On the contrary, they expand your opportunities, regardless of which robot manufacturer you choose.

Zimmer Group’s ability to deliver effective solutions has been valued by project managers, designers, and engineering directors for many years. We have been developing our gripper systems in close collaboration with integrators and end customers for more than 30 years. Our team of twenty designers and project managers draws on more than 100 years of collective design experience in the development of custom gripper systems. The team has access to fabrication and assembly facilities that are specifically designed to execute individualized customer requirements with flexibility and speed.
